German — Learning

Erfan Boostan

AI Product Engineer · Mobile & Web Developer

AI product engineer who takes products from idea to launch. Founder of **Team Memory** (teammemory.online), an AI that tracks the decisions and promises in a team's chats across Telegram, WhatsApp, Slack and Discord. Shipped two apps to the App Store and Google Play, and built the frontend for a marketplace used in six countries. I build end to end with the Claude API and AI-assisted development, in Kotlin Multiplatform, React/Next.js, Expo and Supabase, with a focus on testing and shipping.

EXPERIENCE

Founder & Engineer — Team Memory — 2026 – present

AI that tracks decisions, promises and open questions in team chats on Telegram, WhatsApp, Slack and Discord, and follows up until work is done. Live since October 2026. teammemory.online

- Next.js, Supabase and Claude API; per-team encryption keys, 90-day data deletion.
- 401 automated tests; web dashboard and Claude connector.

Mobile Developer — RingosTechnology — Jan 2026 – May 2026

KibRide, ride-hailing platform for North Cyprus. Live on the App Store and Google Play.

- Built separate passenger and driver apps in Kotlin Multiplatform, sharing business logic across Android and iOS.
- Implemented Firebase authentication, Firestore data model and real-time ride tracking between passenger and driver.
- Built and deployed the marketing site on a custom domain.

Frontend & UI/UX Developer (contract) **—** Automech

Mechanic marketplace live in Cyprus, Greece, Estonia, Latvia, Lithuania and Germany.

- Designed and deployed the responsive product site in React, Next.js and Tailwind CSS.
- Delivered UI/UX for both consumer and mechanic apps: two user types, one consistent design system.
- Designed launch content for the brand's Instagram campaign.

PRODUCTS

Vibe Quest — Founder & Engineer

Social app for real-world quests with friends, with rewards backed by proof of presence.

- Expo (React Native) and Supabase/Postgres, with server-side XP, points and levels.
- Three verification methods: time-limited QR codes, proximity vouching within 150 m, and partner-venue staff scans.
- Group weekend plans with geofenced check-in, peer confirmation and automatic pot settlement.

AI Customer Assistant

Answers a business's customers in Turkish, English, Russian and Persian using only its own stock and rules, and captures leads. github.com/er369ai/ai-customer-assistant

- Python, Claude API with tool use and prompt caching; 62 automated checks plus an end-to-end browser test.

KKTC Web — Lead generation tool

- Python tool that collected and cleaned about 3,400 local business contacts and drafted personalised outreach with the Claude API.

SKILLS

Mobile	Kotlin · Kotlin Multiplatform · Expo / React Native · App Store and Google Play releases
Web	React · Next.js · TypeScript · Tailwind CSS
Backend	Supabase / Postgres · Firebase · REST APIs · Python · Git · Vercel
AI	Claude API (tool use, prompt caching) · LLM integration · AI-assisted development with Claude Code
Design	UI/UX for mobile and web · Figma

EDUCATION

BSc AI Engineering (in progress) — 2023 – present

Cyprus International University, Nicosia
