CERTIFICATIONS

Claude Platform 101 — Certificate of Completion, Anthropic

LANGUAGES

Persian — Native

English — C1 (EF SET, 2026) · B2 grade 4.0, Warsaw University of Technology (2020) · educated in English from grade 11

Turkish — Intermediate, conversational

German — B2 certificate (DKH Institut, Hannover, 2021); refreshing

Erfan Boostan

AI Product Engineer · Mobile & Web Developer

Ships products end to end, with two of them live on the App Store and Google Play. Built KibRide, a ride-hailing platform for North Cyprus, in Kotlin Multiplatform on a Firebase backend, and delivered the frontend and UI/UX for Automech, a mechanic marketplace running in six countries. Works AI-first: uses LLM tooling to build faster and to automate the operations around a product — data pipelines, lead systems and internal tooling — then reads, tests and fixes what comes back.

EXPERIENCE

RingosTechnology — Mobile Developer

Built and shipped **KibRide**, a ride-hailing platform for North Cyprus, live on the App Store and Google Play (*com.kibride.passenger.android*) with my details listed as developer contact. Kotlin Multiplatform for shared logic across Android and iOS, with a full Firebase backend: authentication, Firestore data model and real-time ride state. Separate passenger and driver apps, plus the marketing site on a custom domain. **983 files and ~157,000 lines** — 659 Kotlin, 86 XML, 9 Swift — built between January and May 2026, with **22 of the 23 commits on main authored by me**. kktc.kibride.com

Automech — Frontend & UI/UX Developer (contract)

Mechanic marketplace live across Cyprus, Greece, Estonia, Latvia, Lithuania and Germany, on Google Play (*app.automateonline.user*). Designed and deployed the responsive product site and delivered the UI/UX for both the consumer and mechanic-facing apps. React, Next.js, Tailwind CSS. auto-mate-landing.vercel.app

Self-employed — Real Estate Agent

2022 – 2023

Sourced clients and negotiated terms independently.

PROJECTS

Vibe Quest — Founder & Developer

My own product: a meetup and skill-swap platform for Cyprus. Built solo as an Expo/React Native monorepo — two apps, consumer and pro, on a Supabase backend with a shared design package — plus the marketing site. Concept, architecture and build throughout. Apps not yet published. vibequest-ten.vercel.app

Lead-Generation & Outreach Automation — Built and operated

The sales pipeline behind my own web-development business, built AI-first and in daily use — **2,369 lines of Python across 10 modules**. Scrapes property and vehicle directories, validates contacts, and reconciles duplicates by phone normalisation and Turkish-aware name folding; **~3,400 records collected, 977 ranked leads live**. Copy is generated per business, and sending is paced and human-approved by design. The deduplicator reads the operator's **WhatsApp IndexedDB** directly, treating live conversation history as ground truth over the written log — **218 conversations reconciled, four duplicate approaches caught**. Python, browser automation, IndexedDB. er369ai.github.io/galeri/

SKILLS

Mobile	Kotlin · Kotlin Multiplatform (KMP) · Expo / React Native · App Store & Google Play releases
Web	React · Next.js · TypeScript / JavaScript · Tailwind CSS · Responsive UI/UX design
Backend & Cloud	Firebase (Authentication, Firestore, real-time data) · REST APIs · Python · Git · Vercel
AI & Automation	LLM-assisted development · prompt design · workflow automation · web scraping & data extraction · browser automation · LLM API integration in production apps
Also	C# · C++ · Pandas · data cleaning and analysis

EDUCATION

Cyprus International University — BSc, in progress 2023 – present

Warsaw University of Technology — Foundation Year, completed 2020 – 2021
600-hour preparatory course for undergraduate study in English. Completed June 2021.
Mathematics 5.0/5.0, Physics 4.5, English 4.0, Polish 4.5.

Georgian-American School “Progress” — American High School Diploma (AdvancED), GPA 4.0/4.0, taught in English from grade 11 Batumi, Georgia · 2018 – 2020
