Erfan Boostan

AI Product Engineer | Mobile & Web Developer

Nicosia, Cyprus | Open to remote contract and full-time roles, and to relocation
Phone: +90 539 138 45 76 | Email: erfan.boostan@gmail.com
Portfolio: er369ai.github.io | GitHub: github.com/er369ai | LinkedIn: linkedin.com/in/erfan-boostan-6a67191b8

PROFESSIONAL SUMMARY

AI product engineer who takes products from idea to launch. Founder of Team Memory (teammemory.online), an AI that tracks the decisions and promises in a team's chats across Telegram, WhatsApp, Slack and Discord, built on Next.js, Supabase and the Claude API. Shipped two apps to the Apple App Store and Google Play, and built the frontend for Automech, a mechanic marketplace used in six countries. Builds end to end with the Claude API and AI-assisted development, in Kotlin Multiplatform, React/Next.js, Expo and Supabase, with a focus on testing and shipping. Native Persian, fluent English (C1).

EXPERIENCE

Founder and Engineer — Team Memory, Nicosia, Cyprus (2026 – present)

- AI that tracks decisions, promises, ideas and open questions in the group chats a team connects (Telegram, WhatsApp, Slack, Discord), links each one to its source message, and follows up with the right person until the work is done. Live at teammemory.online since October 2026.
- Designed it to be trusted with private chats: the AI announces itself in every chat it reads, anyone can hide a message, each team's messages are encrypted with the team's own key, raw messages are deleted after 90 days, and it tracks topics, never individual productivity. Reminders go to the group, the person privately or the owner's weekly roundup, and never at night.
- Added an AI assistant that works from the user's own WhatsApp or Telegram. With Plans, the user says who does what by when, Claude drafts the messages, the user approves them before anything is sent, and the assistant follows up until every task is done, respecting quiet hours.
- Next.js on Vercel, Supabase (Postgres, authentication, edge functions) and the Claude API. Web dashboard with a 3D memory map, reminders with Done and Snooze, and a Claude connector (MCP). 401 automated tests.

Mobile Developer — RingosTechnology, Nicosia, Cyprus (January – May 2026)

- Built KibRide, a ride-hailing platform for North Cyprus with separate passenger and driver apps, and shipped it to the Apple App Store and Google Play (com.kibride.passenger.android).
- Built both apps in Kotlin Multiplatform, sharing business logic across Android and iOS.
- Implemented Firebase authentication, the Firestore data model and real-time ride tracking between passenger and driver.
- Built and deployed the marketing site on a custom domain. Wrote nearly all of the codebase.

Frontend & UI/UX Developer (contract) — Automech (May – August 2026)

- Mechanic marketplace live in Cyprus, Greece, Estonia, Latvia, Lithuania and Germany (app.automateonline.user).
- Designed and deployed the responsive product site in React, Next.js and Tailwind CSS.
- Delivered UI/UX for both the consumer and the mechanic app: two user types, one consistent design system.
- Designed launch content for the brand's Instagram campaign.

PRODUCTS

Vibe Quest — Founder and Engineer

- Social app for real-world quests with friends, with rewards backed by proof of presence. Built in Expo (React Native) on Supabase / Postgres, with server-side XP, points and levels. Not yet published.
- Three verification methods: time-limited QR codes, proximity vouching within 150 m, and partner-venue staff scans. Group weekend plans with geofenced check-in, peer confirmation and automatic pot settlement.

AI Customer Assistant (Claude API) — Builder

- AI that answers a small business's customers in Turkish, English, Russian and Persian using only that business's own stock, prices and policies; it never invents a price or gives a discount. Captures leads through tool calling and reminds the owner when a lead waits too long. Editions for car galleries and estate agencies. github.com/er369ai/ai-customer-assistant
- Evaluated the prompt against 12 customer scenarios (four languages, reserved stock, a low cash offer, prompt injection, missing information): 11 passed first time, and the one failure was fixed in the prompt. 62 automated checks plus an end-to-end browser test; prompt caching, refusal fallback and per-chat cost tracking.

KKTC Web (website service) — Builder and Operator

- Fixed-price, one-week website service for small businesses in North Cyprus. Built the Python lead-generation tool that finds its clients: it collects businesses from listing sites, cleans and deduplicates contacts, and checks message history so no business is contacted twice (about 3,400 businesses so far). Drafts a personalised message for each business with the Claude API; every message is reviewed and sent by hand. kktcweb-er369ais-projects.vercel.app

SKILLS

AI: Anthropic Claude API, LLM tool use (function calling), prompt caching, MCP connectors, prompt design, LLM evaluation with scenario tests, AI-assisted development (Claude Code), web scraping, data extraction, browser automation
Mobile: Kotlin, Kotlin Multiplatform (KMP), Android, iOS, React Native, Expo, Apple App Store and Google Play releases
Web: React, Next.js, TypeScript, JavaScript, Tailwind CSS
Backend and cloud: Supabase (PostgreSQL, authentication, edge functions), Firebase, REST APIs, Python, Git, Vercel
Design: UI/UX for mobile and web, Figma, privacy by design, building and launching end to end
Tools and data: GitHub, Linux, Pandas, SQL, C#, C++
Languages: Persian (native), English (C1), German (B2 certificate 2021, relearning), Turkish (basic)

OTHER WORK

Barista — Kiki Roza Coffee House, Lefkoşa, North Cyprus (October 2026 – present)

Barista — Mackbear Coffee, Girne, North Cyprus (2024 – 2025). High-volume shifts in an English-speaking café.

Real Estate Agent (self-employed) — Cyprus (2022 – 2023). Found clients and handled negotiations myself.

EDUCATION

Cyprus International University — BSc AI Engineering, in progress (2023 – 2028 expected), Nicosia, Cyprus

Warsaw University of Technology — Foundation Year, completed (2020 – 2021). 600-hour preparatory course for undergraduate study in English. Mathematics 5.0/5.0, Physics 4.5, English 4.0, Polish 4.5.

Georgian-American School "Progress" — American High School Diploma (AdvancED), GPA 4.0/4.0, taught in English from grade 11. Batumi, Georgia (2018 – 2020).

CERTIFICATIONS

Claude Platform 101 — Certificate of Completion, Anthropic

EF SET English Certificate — C1 (2026)

English B2, grade 4.0 — Warsaw University of Technology (2020)

German B2 — DKH Institut, Hannover (2021)
