CERTIFICATIONS

Claude Platform 101 — Certificate of Completion, Anthropic

LANGUAGES

Persian — Native

English — C1 (EF SET, 2026) · B2 grade 4.0, Warsaw University of Technology (2020) · educated in English from grade 11

Turkish — Basic (I read it; I am not conversational yet)

German — B2 certificate (DKH Institut, Hannover, 2021); refreshing

Erfan Boostan

AI Product Engineer · Mobile & Web Developer

I build and ship apps. KibRide, a ride-hailing app for North Cyprus, is live on the App Store and Google Play — I wrote it in Kotlin Multiplatform on Firebase. I also built the frontend and UI/UX for Automech, a mechanic marketplace running in six countries. I use AI tools heavily to work faster, and I test and fix what they give me rather than trusting it.

EXPERIENCE

RingosTechnology — Mobile Developer

I built **KibRide**, a ride-hailing app for North Cyprus, and shipped it to the App Store and Google Play (*com.kibrider.passenger.android*). Kotlin Multiplatform for the code shared between Android and iOS, Firebase for the backend — sign-in, the database, and live ride tracking. Separate apps for passengers and drivers, plus the website. I wrote nearly all of it, between January and May 2026.

Automech — Frontend & UI/UX Developer (contract)

A marketplace for finding mechanics, used in Cyprus, Greece, Estonia, Latvia, Lithuania and Germany (*app.automateonline.user*). I built the website and designed the interface for both apps — the one customers use and the one mechanics use. React, Next.js, Tailwind.

Self-employed — Real Estate Agent

2022 – 2023

Found my own clients and handled the negotiations myself.

PROJECTS

Vibe Quest — Founder & Developer

My own project — an app for meeting people and swapping skills in Cyprus. Two apps, one for everyday users and one for professionals, built in Expo/React Native on Supabase, plus the website. The idea, the design and the code are all mine. Not published yet.

Lead-Generation & Outreach Automation — Built and operated

A Python tool I built to find and contact local businesses for my web work. It scrapes listing sites, cleans up the contact details, and checks my own WhatsApp history so nobody gets messaged twice. About 3,400 businesses collected so far, 977 in the current list. It writes a different message for each business, tailored to what that business actually sells, and I review and send every one myself.

SKILLS

Mobile	Kotlin · Kotlin Multiplatform (KMP) · Expo / React Native · App Store & Google Play releases
Web	React · Next.js · TypeScript / JavaScript · Tailwind CSS · Responsive UI/UX design
Backend & Cloud	Firebase (Authentication, Firestore, real-time data) · REST APIs · Python · Git · Vercel
AI & Automation	LLM APIs in production apps · prompt design · web scraping & data extraction · browser automation
Also	C# · C++ · Pandas · data cleaning and analysis

EDUCATION

Cyprus International University — BSc, in progress

2023 – present

Warsaw University of Technology — Foundation Year, completed

2020 – 2021

600-hour preparatory course for undergraduate study in English. Completed June 2021.

Mathematics 5.0/5.0, Physics 4.5, English 4.0, Polish 4.5.

Georgian-American School “Progress” —

Batumi, Georgia · 2018 – 2020

American High School Diploma (Advanced), GPA

4.0/4.0, taught in English from grade 11
