Erfan Boostan

Mobile Developer | Frontend Developer | AI Product Engineer | Software Engineer

Nicosia, Cyprus | Open to relocation (EU) and remote work
Phone: +90 539 138 45 76 | Email: erfan.boostan@gmail.com
GitHub: github.com/er369ai | Portfolio: er369ai.github.io

PROFESSIONAL SUMMARY

Mobile and web developer who builds and ships production applications. Author of KibRide, a ride-hailing app for North Cyprus live on the Apple App Store and Google Play, written in Kotlin Multiplatform on Firebase. Built the frontend and UI/UX for Automech, a mechanic marketplace operating in six countries. Uses LLM APIs in production and tests and corrects generated output rather than trusting it. Native Persian, fluent English (C1).

CORE SKILLS

Mobile: Kotlin, Kotlin Multiplatform (KMP), Android, iOS, React Native, Expo, App Store Connect, Google Play Console, mobile app release management
Web: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive design, UI/UX design
Backend and Cloud: Firebase (Authentication, Firestore, real-time database), Supabase, PostgreSQL, SQL, REST APIs, Python, Vercel
AI and Automation: LLM APIs in production, Anthropic Claude API, LLM tool use (function calling), prompt caching, MCP connectors, prompt engineering, prompt design, web scraping, data extraction, browser automation, ETL, data pipelines
Data: Pandas, data cleaning, data analysis, CSV and JSON processing
Tools: Git, GitHub, Linux, C#, C++
Languages: Persian (native), English (C1), German (B2, refreshing), Turkish (basic)

PROFESSIONAL EXPERIENCE

Mobile Developer — RingosTechnology, Nicosia, Cyprus (2026)

- Built KibRide, a ride-hailing application for North Cyprus, and shipped it to the Apple App Store and Google Play (com.kibride.passenger.android).
- Used Kotlin Multiplatform for code shared between Android and iOS, and Firebase for authentication, database and live ride tracking.
- Delivered separate passenger and driver applications plus the marketing website. Wrote nearly all of the codebase between January and May 2026.

Frontend & UI/UX Developer (contract) — Automech

- Built the website and designed the interface for a mechanic marketplace used in Cyprus, Greece, Estonia, Latvia, Lithuania and Germany (app.automateonline.user).
- Delivered the customer-facing and mechanic-facing interfaces using React, Next.js and Tailwind CSS.

Barista — Kiki Roza Coffee House, Lefkoşa, North Cyprus (October 2026 – present)

- Started October 2026. Evening shifts on the espresso bar and counter.

Barista — Mackbear Coffee, Girne, North Cyprus (2024 – 2025)

- Espresso and filter coffee preparation, counter service and high-volume shift work in an English-speaking customer environment.

Real Estate Agent (self-employed) — Cyprus (2022–2023)

- Sourced clients independently and handled negotiations directly.

PROJECTS

Team Memory (AI for team chats) — Founder and Builder (2026)

- AI service that reads the group chats a team connects (Telegram, WhatsApp, Slack, Discord), extracts decisions, promises, ideas and open questions linked to their source messages, and sends reminders before they are forgotten. Live at teammemory.online.
- Next.js on Vercel, Supabase (Postgres, auth, edge functions) and the Claude API; per-team encryption, 90-day message retention, web dashboard with a 3D memory map, and a Claude connector (MCP). 324 automated tests. Built by directing AI coding tools; early stage.

AI Customer Assistant (Claude API) — Builder (2026)

- AI assistant that answers a small business's customers in Turkish, English, Russian and Persian using only that business's own stock, prices and policies. Editions for car galleries and estate agencies. github.com/er369ai/ai-customer-assistant
- Captures leads through LLM tool calling (name, phone, request, Turkish and English summary for the owner) and reminds the owner when a lead waits too long without a call.
- Python and the Anthropic SDK: prompt caching, refusal fallback, per-chat cost tracking, local-only server. 62 automated checks plus an end-to-end browser test. Built by directing Claude Code; working prototype.

Lead-Generation & Outreach Automation — Builder and Operator

- Python system that collects local business data from listing sites, cleans and deduplicates contact records, and checks message history so no contact is approached twice.
- Approximately 3,400 businesses collected; 977 in the active list. Generates a message tailored to each business using an LLM API; every message is reviewed before sending.
- Covers web scraping, data cleaning, segmentation, template and LLM copy generation, and outcome tracking.

Vibe Quest — Founder and Developer

- Skill-swapping and social application for Cyprus: two apps (general users and professionals) plus website, built in Expo / React Native on Supabase. Concept, design and code all own work. Not yet published.

EDUCATION

Cyprus International University — BSc Artificial Intelligence, in progress (2023 – present), Nicosia, Cyprus

Warsaw University of Technology — Foundation Year, completed (2020 – 2021). 600-hour preparatory course for undergraduate study in English. Mathematics 5.0/5.0, Physics 4.5, English 4.0, Polish 4.5.

Georgian-American School "Progress" — American High School Diploma (AdvancED), GPA 4.0/4.0, taught in English from grade 11. Batumi, Georgia (2018 – 2020).

CERTIFICATIONS

Claude Platform 101 — Certificate of Completion, Anthropic

EF SET English Certificate — C1 (2026)

English B2, grade 4.0 — Warsaw University of Technology (2020)

German B2 — DKH Institut, Hannover (2021)
