Erfan Boostan

AI Product Engineer

Nicosia, Cyprus | Open to remote work and relocation (EU)
Phone: +90 539 138 45 76 | Email: erfan.boostan@gmail.com
Portfolio: er369ai.github.io | GitHub: github.com/er369ai | LinkedIn: linkedin.com/in/erfan-boostan-6a67191b8

PROFESSIONAL SUMMARY

AI product engineer who builds and ships complete AI products. Founder of Team Memory (teammemory.online), an AI that tracks the decisions and promises in a team's chats across Telegram, WhatsApp, Slack and Discord, built on Next.js, Supabase and the Claude API. Also shipped KibRide, a ride-hailing app live on the Apple App Store and Google Play, and the frontend for Automech, a mechanic marketplace used in six countries. Works by directing AI coding tools, and tests what they produce before trusting it. Native Persian, fluent English (C1).

EXPERIENCE

Founder and Builder — Team Memory, Nicosia, Cyprus (2026 – present)

- Built and launched an AI service that reads the group chats a team connects (Telegram, WhatsApp, Slack, Discord), extracts decisions, promises, ideas and open questions linked to their source messages, and reminds the right person before they are forgotten. Live at teammemory.online since October 2026; early stage.
- Designed it to be trusted with private chats: the AI announces itself in every chat it reads, anyone can hide a message, each team's messages are encrypted with the team's own key, raw messages are deleted after 90 days, and it tracks topics, never individual productivity. Reminders go to the group, the person privately or the owner's weekly roundup, and never at night.
- Next.js on Vercel, Supabase (Postgres, authentication, edge functions) and the Claude API. Web dashboard with a 3D memory map, reminders with Done and Snooze, and a Claude connector (MCP). 324 automated tests.

Mobile Developer — RingosTechnology, Nicosia, Cyprus (2026)

- Built KibRide, a ride-hailing app for North Cyprus with separate passenger and driver apps, and shipped it to the Apple App Store and Google Play (com.kibride.passenger.android), plus the marketing website.
- Kotlin Multiplatform for code shared between Android and iOS; Firebase for sign-in, the database and live ride tracking. Wrote nearly all of the codebase between January and May 2026.

Frontend & UI/UX Developer (contract) — Automech

- Built the website and designed the customer and mechanic interfaces for a mechanic marketplace used in Cyprus, Greece, Estonia, Latvia, Lithuania and Germany (app.automateonline.user), in React, Next.js and Tailwind CSS.

AI PROJECTS

AI Customer Assistant (Claude API) — Builder (2026)

- AI that answers a small business's customers in Turkish, English, Russian and Persian using only that business's own stock, prices and policies; it never invents a price or gives a discount. Captures leads through tool calling and reminds the owner when a lead waits too long. Editions for car galleries and estate agencies. github.com/er369ai/ai-customer-assistant
- Evaluated the prompt against 12 customer scenarios (four languages, reserved stock, a low cash offer, prompt injection, missing information): 11 passed first time, and the one failure was fixed in the prompt. 62 automated checks plus an end-to-end browser test; prompt caching, refusal fallback and per-chat cost tracking.

Lead-Generation & Outreach Automation — Builder and Operator

- Python system that collects local business data from listing sites, cleans and deduplicates contacts, and checks message history so no business is contacted twice. About 3,400 businesses collected, 977 in the active list. Generates a message tailored to each business using an LLM API; every message is reviewed before sending.

Vibe Quest — Founder and Developer

- Skill-swapping and social app for Cyprus: two apps (general users and professionals) plus website, built in Expo / React Native on Supabase. Concept, design and code all own work. Not yet published.

SKILLS

AI: Anthropic Claude API, LLM tool use (function calling), prompt caching, MCP connectors, prompt design, LLM evaluation with scenario tests, AI-assisted development (Claude Code), web scraping, data extraction, browser automation
Product: UI/UX design, privacy by design, building and launching end to end (App Store, Google Play, web)
Web and backend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Supabase (PostgreSQL, authentication, edge functions), Firebase, REST APIs, Python, Vercel
Mobile: Kotlin, Kotlin Multiplatform (KMP), Android, iOS, React Native, Expo
Tools and data: Git, GitHub, Linux, Pandas, SQL, C#, C++
Languages: Persian (native), English (C1), German (B2, refreshing), Turkish (basic)

OTHER WORK

Barista — Kiki Roza Coffee House, Lefkoşa, North Cyprus (October 2026 – present)

Barista — Mackbear Coffee, Girne, North Cyprus (2024 – 2025). High-volume shifts in an English-speaking café.

Real Estate Agent (self-employed) — Cyprus (2022 – 2023). Found clients and handled negotiations myself.

EDUCATION

Cyprus International University — BSc Artificial Intelligence, in progress (2023 – present), Nicosia, Cyprus

Warsaw University of Technology — Foundation Year, completed (2020 – 2021). 600-hour preparatory course for undergraduate study in English. Mathematics 5.0/5.0, Physics 4.5, English 4.0, Polish 4.5.

Georgian-American School "Progress" — American High School Diploma (AdvancED), GPA 4.0/4.0, taught in English from grade 11. Batumi, Georgia (2018 – 2020).

CERTIFICATIONS

Claude Platform 101 — Certificate of Completion, Anthropic

EF SET English Certificate — C1 (2026)

English B2, grade 4.0 — Warsaw University of Technology (2020)

German B2 — DKH Institut, Hannover (2021)
